#### **WHO Global Body Mass Index Estimates**

The values presented in this spreadsheet are WHO Global InfoBase estimates for three indicators, including:

- 1. Obesity (Body Mass Index greater than or equal to 30 kg/m<sup>2</sup>)**
- 2. Overweight (Body Mass Index greater than or equal to 25 kg/m<sup>2</sup>)**
- 3. Mean Body Mass Index (kg/m<sup>2</sup>)**

**There are also 3 worksheets that described the country rankings for 2005 estimates**
